Profile

I am a passionate full stack programmer who identifies repetitive processes and turns them into quality code, providing automated solutions that enhance productivity and efficiency.

My methodical and structured approach allows me to tackle challenges systematically, ensuring the timely delivery of high-quality solutions.

I am patient and meticulous in my work, which enables me to find creative solutions.

I am always seeking to learn and grow professionally. I enjoy exploring new tools and technologies, also I have the ability to quickly incorporate new knowledge into my projects to keep them up-to-date and competitive.

Education

Systems analyst, Instituto Belgrano	2004 – 2006
Electronic Technical, E.E.T 447	1997 – 2022

Soft Skills

Structured • Studious • Organized • Teamwork • Persistent • Empathic

Hard Skills

Node JS - Javascript - React JS - MongoDB - Linux - Ubuntu - Docker - SQL - GIT - GitHub - HTML5 - CSS3 - Bootstrap - Tailwind - Proxmox - SSH - PHP

Professional Experience

Full Stack Developer, Sinapsis SRL Nodejs App	02/2021 – present
--	-------------------

Tasks: Design development - Implementation - Deploy in production - Maintenance - Updates

Stack: Ubuntu Server 22.04 - Docker - Docker Hub - NGINX - API REST NodeJS - DATABASE MongoDB - MySQL - React - Vite - Bootstrap - GIT
GitHub

Value: More agile and efficient searches, high availability, and a comfortable user experience

Achievements: Replace old and obsolete interface - View repair orders easily - Repair statistics - Maintain stock - Send email notifications - Faster searches - Account Summaries - Sales account summary with commission - Automation of email sending of pending invoices in PDF

Nodejs App

Tasks: Design development - Implementation - Deployment in production - Maintenance - Updates

Stack: Ubuntu Server 22.04 - Docker - Docker Hub - NodeJS - GIT - GitHub

Value: Operational efficiency increased.

Achievements: A process that required a full work day was reduced to just 5 minutes. Nearly 100 statements are generated in xlsx format and emailed each week.

Ecommerce

Tasks: Modifications - Deployment in production - Maintenance - Updates

Stack: PHP - HTML - CSS - Bootstrap - GIT - GitHub

Value: Better user experience. Bug fixes. New styles and sections.

Achievements: Faster product loading. Increase in new users

Web Design - Freelance, Solvo

11/2021 – 04/2022

Web Page

Tasks: Website development based on design sent by designer

Stack: HTML - CSS - JAVASCRIPT - ODOO

Value: New web pages.

Achievements: Delivery time and form
